DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-31 in the reply filed on 9/23/2007 is acknowledged.
2. Applicant's election with traverse of species A, claims 1-4, 13, 17-19 and 22, in the reply filed on 9/23/2007 is acknowledged. The traversal is on the ground(s) that species C and F would not impose a serious burden on the Examiner. In the instant case, each species requires different search strategies and therefore constitutes a serious burden. However, Examiner agrees that Fig. 6 is related to species A and will hereby be included into species A. Fig. 17 depicts a capsule having different structural features than that of those depicted in species A and is hereby withdrawn from further consideration.
3. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, 13, 17-19 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by McBride et al. (5,356,021). McBride et al. discloses the limitations of the claims including a device (figs. 1-8) comprising capsule (10), diaphragm (14), cup-

shaped diaphragm is stretched (fig. 3), flange (30), plastic (col. 3, line 7), sealing element (12), retaining shoulders (inherent with pilfer band 26 and threads), tear-off line (serrated connection of pilfer band 26 and capsule).

Conclusion

6. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
